

CORE Methods Alternative Education Program

From Tier 3 to Tier 1:
Building Pathways Back
to the Classroom

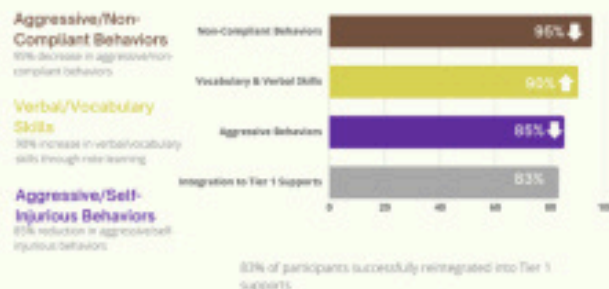

What is CORE Methods?

The CORE Methods Alternative Education Program is a flexible reintegration program that meets students and educators in their environment, providing support and education to those around the student to maximize talent and develop a clear path of integration. This approach, developed by Dr. Bethany Bilodeau, has demonstrated an 83% success rate in transitioning Tier 3 students back into Tier 1 supports, ensuring sustainable reintegration and long-term success in the classroom.

Proven Results

CORE Methods produces measurable improvements in student behavior, learning, and successful reintegration into Tier 1 classrooms.

CORE Methods Alternative Education Program Results

Impact on Schools & Districts

Reintegrating students through CORE Methods reduces the need for costly out-of-district placements, allowing schools to reallocate resources where they matter most. Districts benefit from decreased behavioral incidents, stronger academic outcomes, and the ability to maintain student success within their own classrooms. This program helps schools not only save money but also build lasting capacity for inclusive education.

Districts face rising costs from out-of-district placements – often exceeding \$100,000 per student each year. CORE offers a proven, cost-effective alternative that keeps students connected while saving districts significant resources.

Investment in CORE Methods

- Program Planning & Coordination:** Staff training, environment setup, parent/admin meetings, data tracking, and reintegration prep.
- On-Site Behaviorist Support:** Direct student support, and initial setup cost.

Travel expenses may apply

What's Included:

- Direct support for students to ensure successful reintegration
- Staff training and coaching for sustainable strategies
- Guidance on classroom environment and procedures
- Assistance with parent and administration meetings
- Data setup and tracking to measure outcomes

WHAT SCHOOLS ARE SAYING

"Working hand in hand with Dr. B and her CORE team exponentially changed the way I performed my job and in turn helped me change the lives of children I work with."

Angela Carter, Paraprofessional

"Dr. B and CORE Methods are working at the forefront of student and staff wellness in a time when we need it most!"

Scott Laliberte, Director of Innovative Projects at UNH

Why us?

We are passionate about helping others feel safe; physically and psychologically so people can fully explain their feelings and select their behaviors.

Students have reintegrated into the school setting, being engaged and connected with an **83% success rate.**

Meet the Creator of CORE Methods

Dr. Bethany Bilodeau is a nationally recognized leader in behavioral intervention and educational support systems.

With over 20 years of experience working with students, families, and schools, she has dedicated her career to developing practical, evidence-based strategies that address challenging behaviors while fostering growth and reintegration. Her expertise in behavior analysis and systems change led to the creation of CORE Methods, a program proven to help schools reduce costs, empower staff, and transform student outcomes.
